

EMBL
Australia

Two-week course
from 20 November
to 1 December

Applications open
until 15 June 2023

Free to attend -
Accommodation
and meals covered

Open to 1st &
2nd-year PhD
students across
life sciences

Hosted at the
Australian National
University, Canberra

APPLY NOW:

EMBL Australia PhD Course applications are now open!

Now in its eighth year, the EMBL Australia PhD Course offers an incredible opportunity for first and second-year life science PhD students to learn from some of the brightest and most inspiring scientists from around Australia.

This two-week course, modelled on the pre-doc training program at the prestigious European Molecular Biology Laboratory (EMBL), covers the latest ideas and advances in molecular biology and the life sciences.

Workshops and topics include:

Advance Techniques in Flowcytometry
with Snow Fellow Dr Michelle Boyle

Imaging Concepts in Cellular
Organisation and Motility
with Dr Steve Lee

Drug Discovery
and Pre-Clinical Models
with Dr Ameer George

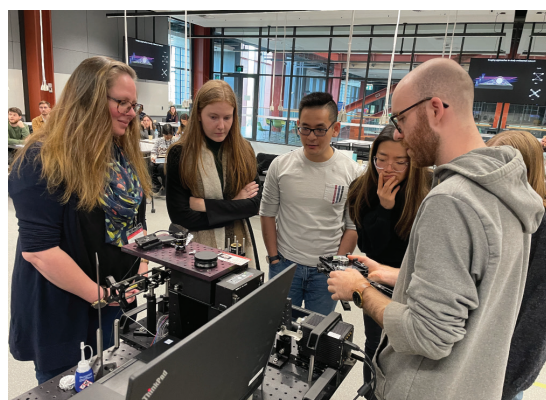

Physics for biology
with Dr Richard Morris

plus science communications,
career progression, 3MT competition
& team building exercises

3MT prize-winner
Yunan Ye

Supported by:

2022 PhD Course students during
a microscopy workshop

EMBL Australia is a life science network that maximises the benefits of Australia's associate membership of The European Molecular Biology Laboratory (EMBL).
